

## TECHNICAL & APPLICATIONS

### MEGAMIXER Threaded Paddles

- guaranteed mixing paddles
- threaded to fit directly into mixer drill
- largest range of designs & sizes
- paddles for liquids & powders
- plasters, cements & resins

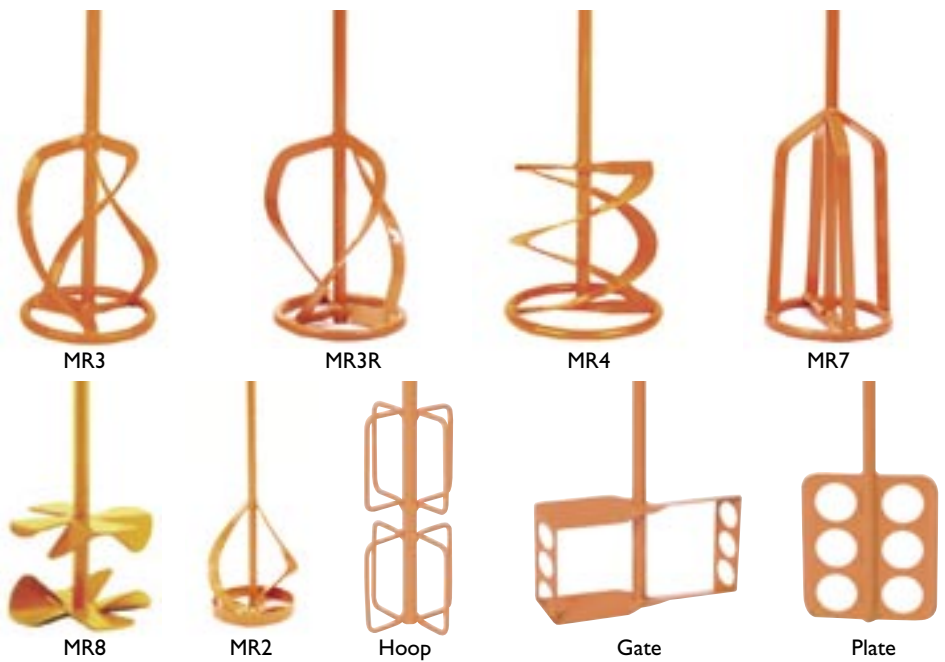

Threaded EPI mixer paddles fit directly into the front end of the mixer drill and are recommended where the power tool will be used mainly for mixing. See chart on p11 for the full range of applications.

The MEGAMIXER Paddles are designed to give efficient mixing and an easy mix action.

### MR3 Spiral Paddles

MR3 paddles are the most popular design for a wide range of bagged materials, plaster, cements, resins, coatings, wet and pourable mixes. The MR3 paddles develop a top to bottom mix action; the MR3R paddles are the same design but with a right hand spiral and bottom to top mix action.
