

FineWoodworking
HANDS ON
TAMPA

Welcome to our first ever Hands On event. You have a tight schedule of woodworking instruction ahead of you this weekend, but you are also going to get a taste of all that this one-of-a-kind neighborhood has to offer. It's going to be a blast.

I want to thank the presenters for lugging all their gear to Florida to be here with us. Thank you to our sponsors, as well as Kate Swann and her staff at the Florida School of Woodwork. And finally, thanks to all of our attendees for signing up and spending time with us.

Tom McKenna
Editorial Director
Fine Woodworking

Through Any Material

RIKON & Striatech have combined their expertise to develop the WORLD'S FIRST DVR SMART BANDSAW

*It's been almost 200 years since the bandsaw was first produced.
In that time, the technology has barely changed... until now.*

By adding Striatech's smart switched reluctance motor, RIKON's 14" bandsaw series is better than ever before. Unlike previous bandsaw motors, the Striatech motor is infinitely variable, and offers continuous torque. This means a beautiful finish on your work piece, and a much easier user experience. Improved energy efficiency and quiet, vibration-free operation are added bonuses to this already amazing saw line up.

With an easy-to-read screen and DVR controller,
this technology adds much-needed features to the bandsaw.
