

ELIMINATE KICKBACK ON TABLE SAWS!

New! Active AKS anti-kickback system

- active, electronic AKS system cannot be defeated
- detects 3 common forms of kickback
- board pinching the saw blade & thrown back
- board binding between saw blade and fence & thrown back
- board rotating away from fence & thrown back
- works with saw blade brake to mitigate kickback
- integrated into throat plate of modern table saws

Demonstration video available here!
